In the Consular reports we are accustomed in these days to look for references to the decline in exchange and the injury thereby inflicted on traile. Mr. TROUP's report on the trade of Yokohana for last year is no exception to the rule. The feature of the commercial year," says Mr. TROUP, " has been a further ener-" mous fall in exchange, and the derange-"ment caused by this in fluancial matters. "An effect of the fall of the silver dollar has "again been to render it difficult to obtain "covering prices for imports; and thus, in " those branches of trade where home Japa-" nose manufactures come into competition " with the imported articles, to afford special " pretection to the home manufacturer. " regards exports, the stimulating effect of "The fall of exchange on those has often been Japanese Minister giving a plodge that she is "insisted on; but, judging from the char-"acter of last year's export trade, it would "appear that the instability in the ratio " between the two measures of value has pro-"duced effects in the commercial world " which have more than counterbalanced this "stimulus. It will have to be noted, in " treating of the silk export, especially, that "the demangement in financial matters, more particularly in the United States, has bad . " a very mjurious offict on the export trade. "In addition to causing these dislocations win trade, the fall of eilper in relation to e gold has sim by proved disastrons where "capital has been brought to the cast for in-

"vestment in commercial enterprises entail." ing liabilities in the west. Not-"withstinding the advance in the prices of "timports, however, caused by the fall of the "dollar, it is instructive to note that a large busines has been lone in imports, and that "the Japanese consumer appears to have been all to rise, in the case of several articles, to this advance in prices. This is " no d am', du to the prosperity which the "country has enjoyed for some years, the "good crops es ecially in 1891 and 1892; the " large export in sik in the latter year of "high prices, and other similar influences. "Some the firther fall in exchange, how-"ever which has taken place since the close "of last your, the import trade in manu-"factures has been stagnant; and to what "extent the J. paness consumer will be pre-"pared to rise to the advanced dollar price. of imports is not yet evident. To say the "least; the trade in imports seems likely to "suffer great restrictions, and, in the case of articles which come in ocompetition with "ex inclien." When we look at the export reof trade finds more or less justification from that source, as well as from the conditions. takes place in regard to exchange. "Ootton

ed and unbloached, fell from 8,581,718.200 1890 to 2.857,748 tons in 1893, and comost grand flores is the better from a pecuniary a larger grant. He was strongly in favour of to 24 hours. The walled in portion of Taiping objects from 628,441 tons in 1890 to 437,849 tons. There are some articles of export from that in the original plan the back stalls being the wells would be at a considerable discount as Great Britain which, while showing an inbrease in quantity show a decrease in way. Mr. Ladds arrangement also places all the question of the standing orders, but on value, this being accounted for by the appreciation of gold, but in the representative cases above cited there has and the number of shops decreased by 12, been a decrease both in quantity and value, showing an actual falling off in trade of value. With a steady exchange, however, even though the rate be a low one, some anticipation of a recovery in the volume of trade may be reasonably indulged in.

The silver valuation of the trade of Japan last year (15 per cont. being added to the Customs valuations of imports to cover freight. costs, and charges) was \$96,960,415 as against 397,580,443, in 1892, the imports amounting to 341,750,829 as against \$96,028,239 and the exports to \$55,209,586 as against \$61,552,204. The falling off in exports is more than accounted for by the smaller export of silk, which amounted to 4.946,202 ths. only as against 7,209;141 lbs. in 1892; otherwise the trade was fairly satisfactory. the Committe consider too small and will be very of the present year will not be so favourable. inches diameter. will probably suffer, though possibly the effect may not be feit in this brauch until next

year. If the war be of short duration, the Japanese, with their wonderful energy, will soon recover from whatever loss the struggle may entail, and the injury to trade may be expected to be of a very temporary character; but it is impossible to overlook the danger of hostilities war being prolonged for several years, to the complete impoverishment of the country.

The tea ex steamer Tacoma, which arrived at Tacoma on the 15th inst., arrived at Chicago the 26th, and at Now York on the 18th inst.

of war is given in the Mainichi. The other day at night. The annexed skatch plan of a section they asked the superintending officers to prefer of the alley-way shows what the Committee on their behalf a demand to the Chinese Go propose. These fish lone properly constructed vernment for their pay,

The bodies of the Japanese soldiers who were killed at the battle of Seikwan and Asan were oremated on the field, and the ashes afterwards taken to Jimson, where a faneral service, was held and the remains interred in the Japanese

The masts of the ill-fated Koroshing are, the Kobe Chronicle cays, will visible where she sank and were seen plainly from the Higo maru on her last trip to Chemulon, standing 40 11, out of the water. One of the Kowshings bosts was also encountered with her stern blown out and several dead bodies were seen finiting in the neighb arhood of the disaster.

The Band of the 1st Shropshire Light Infantry will play the following programms on the Barrack Square to night, commencing at 7:30 p.m.:-

Bon Jour Andrew. Goodwin. "Rickety Rackety" Williams

A ghastly story comes from Keres, says the Kobe Chronicle. It appears that the place near where the Kawshing was sank is a great fishing ground for Finsen dehermen. Of late, however, they have been compelled to abandon this ground. entrance gates, as it will containly prove inas the fish caught wore all found to have human bair in their stomachs, evidently baving been feeding on the corpses of the drowned Chinese: Fish is little eaten at Jinsen just now, somewhat pairely adds the vermonlar journal from which

A very good story, which has the additional morit of being true, is told in an Hotel not far from Pedder's wharf. A visitor at that particular institution (who, or course, must, be nameles-) the other day complained to the office clark that he had lost a tooth brush and comb from his room. He explained that although the harmless but necessary tooth brush was not of much intrinsic worth he valued it immensely himself because it had belonged to his grandfather ! tooth brush which had faithfally served three generations must indeed be interesting.

BONGKONG SANITARY BOARD. The usual fortaightly meeting of the above as held yesterday. Mr. F. H. May (Captain Superintendent of Policel provided and there ree slee present Mr. W. Chathain (Acting Director of Public Works), Dr. Ayras (I'monist Inrgeon) Mr. R. K. Leich, Mr. J. J. Yound Q.C. Mr. Lan Wal Chron, Surgeon Major James Dr. W. Hartigan, and Mr. E. A. Ham (Acting Secretary.)

THE REW CENTRAL MARKET. The following in the report of the Committee appointed by the Sanitary Board of the meeting of the 16th August, 1894 on the Colonial Score ary's letter No. 1408 of 30th July, 1804. The Committee have taken the evidence of Mr. W. Chathem, who has they understant been in special charge of this work from the commenorment. They have also examined Mr. C Vivino Ladds, referred to the correspondence in he possession of the Board on the matter, and

visited the market

The Committee reprot that this question was not referred to the Sanitary Board at an earlier "home Japanese manufactures, probable date as on several points Mr. Chatbam seemed to think it to late to make any ellerations and ther by to call attention to the fact that in Mr. turns of Great Britain Mr. Thour's prediction | MacCallum's letter to the Colonial Secretary of the probable extinction of some branches | a'ed 15th April, 1889, it was requested that the plan might be submitted for the consideration: of the Board, and again og 10th February, 1891 in raply to some questions of the Surveyorobserved in the Far East, pulses some change | G neral the plant were again asked for, but they do not appear ever to have been submitted to the man had already been appointed to report daily whole of these operations they have put forward

paint of view, the stalle being so placed that they the Councittee's recommendations and he moved woold be more on an equality, it being feared that the report be adopted. compared with those facing the confre passage the stalls in one action and the shops in the motion of Mr. J. J. Francis, in view of The number of stalls would be increased by 30 allowed to stand over. The first floors remain the amail in both ar-

(2)-Mr. Ladds racommands, "iron or some and not merely a change in the standard other kind of motal? for the partitious of the shops and stalls and the Committee is of opinion that salvania diron or some other non-absorbent material should be used in place of the common China fir now propored for the work. This woodworks will require constant reput

> and can never be kupt in a properly cloun con-(3)-It is proposed that the boltoms of these but the Committee consider it would be emier to keep the place clean if these partitions were onne structed at least 6 inches off the floo. (4)-A dado of glaz d bricks is carried round.

portion of the ground floor of the Bastom seeion, the remainder being of Canton red brick sol in lime mortar. The Committee is of opinion that a dade 4 feet high of some nou-absorbant material should be carried all round the internalwalls of the whole four sections. (b) -The drain pipes from the gutters of the first floors are of iron, 2 luches diameter; these

With the resources of the country taxed to. (6.)-No provision has been made for the dismeet the cost of a war there will not be posal of market refuse and the Committee conthe same amount of money available where- They propose shoots be fixed for discharging the tion to which exchange is more unfavour. and the refuse from the ground floors could also be discharged direct into dust carts from a proable even than it was last year; exports also per platform. This could be conveniently are ranged in the centre allow way between the two

> (7.) The counters of the fish statis should, the committee think, by made of nou-absorbent unterial in place of the wood now propo sod. They not consider Canton marble suitable, as stains very readily. (8.) Entrances should do provided to the stalls

and these the committee consider might by by fleps in the counters. (9.) The Committee bonsider that enitable tanks should be constructed with water laid on for keeping the live fish in. If this is not done wooden tanks will be used bahind and under which dirt will be liable to accumulate The Committee consider that the contre alley-way. between the two blocks of buildings would be the most suitable place for these fish lans. This very valuable space is not at present utilis it and as the fish require constant attention night and day this part could be devoted to the a without An amusing account of the Chinese Prisoner interfering with the main blocks being closed would bring in a large revenue.

(10.) -The Committee regret to see that the entrance gates have been hung to open howerds so that 16 of the most valuable shops adjoining he entrances have been rendered almost use less; This should be altered if possible. (11) - The first floors are well ventilated

the louvres in the roof, but the Committee is opinion that the ground dones require additional ventilation nour the celling. The fanlights over the windows have been fixed, thus laving 5 underside of the coiling. If these fan lights were made to open the beight would be red tod to 3 feet. This the Committee consider mecessary and in addition would like to see similar youtila fors fixed close to the collings to these contrusted near the floors.

(12.) The arrangements for the distribution of water are, the Committee consider, sufficient: while the water is turned on at the mun, but no provision in the form of tanks has been made to copply the market with water in the syent its being shut off during the time of drought. This would have rendered the market during part of last winter entirely without water for 22 out of the 24 hours every day.

(13) The latring accommodation is, the Committee don ider, sufficient for the use of those in in the faces. the market, but they would profer to have seen placed in a position loss accessible to the ontside public than immediately at the Prays see how this is to be presented.

(14.) -These latrines have been placed under the main stairways on the Praya side and the Committee consider them very delicient in light and ventilation, there being culy one window through the outside wall in each arinal and none in the latrines. The urinals have such two ventilation gratings near the floor but noue near the ceilings. The latrices have only one ventil ater each near the floor and none near the colling. It is of course possible to light them electrically, but nuless the ventil tion our be much improved the Committee do not consider them

each latrice into the market and another from each urinal into the stairway. These the Committee consider must be built up. (16)-There are two doors to each set of lairings and urinals and the Committee recommend that one of these be built up, for not only is it rendered inseless by the gates opening against it, but it allows additional opportunities for the foul air to drift into the market.

FRCS. A.M.S. 27th August, 1894. It was resolved | that the report should be forwarded to the Government with the recom-

mendation that the suggestions contained there-MORTALITY STATISTICS AND THE CAUSES OF DEATH.

The Committee uppointed to esquire into the apeation of mortality statistics reported as

We beg to report for the information of the Board flint we have consi bred the question of mortality statistics referred to us as a sub-Committee. After careful enquiry we are of. opinion that the only way to improve the praanot mortality statistics is to have the reports of deaths occurring in the Tung Wik tospital and amongst the Chinese community generally, head unpani d by certificate from pithers Europenn dector or a Chinese des or trained in Western modical science.

In three days, but in a few where The Parsident approved and dispensaries in various parts of the city. yards in 1890 to 9,039,173,700 yards in less outside the mope of this Committee that and that and that and that and that and the shope of this Committee that and that and that and that and the shope of this Committee that and that and that and the shope of this Committee that and that and the shope of this Committee that and that and the shope of the sho 1893, iron and steel from 4,021,430 tong in loar angewood by Mr. Ladds for the period for the college had written asking for was granted to return a transfer the line of from 6 whother they were agreeable to the proposed Jana 21st and finished on July Serl.

The liquid and deposit left in the delefeoting

potes when diluted with a pailful of water, form edayecy suitable parifying aren't world was used for the walls, colliders, and flore by those who undertook the opening up and whitewashing of the proviously disinfected house. On July 4th there were occurring each day several cases of alagno at West Polut, An attempt was made to anticipate the disease by placing half a pound of oliorinated lime damped with a little water on each floor in every house in that district. At the same time the occapants were advised to open all doors and windows, to keep their housesplean, and remove all accumulated filth, and these instructions were very realily carried out by the Chinese, who, on all occasions when nailed up doors and windows had to be opened, expressed their readiness and desire to comply with any measures so clearly taken for their bonefit Whorever malodoges existed their sources were looked for and ultimataly destroyed, for although these fonl exhalations may not of themselves cause disease it is generally recognised that they probably lower the vital tone, thus making hose dwelling amidst them easier prepa to the disease. But as some of the most deleterious emanations have no smell at all, no Chinese house, however clean, was pas ad over without leaving colorioated lime, of which the efficacy in epidemics has been often noted, but however, not often understood On the present occasion it should not be over the looked that disinfestants may own their power of Board has no power to insist on compulsory or ducing immunity to (1) the destruction of the living cause of the disease. (2: by hindering the

In these distributions to 7,100 Chinese houses, In conclusion I am to state that, so far as His 14,500 pounds (inclusive of about 1,000 pounds Excellency is aware, the Sanitary Board had sprinkled over some streets and alleys) of 3rd instruction he went to the Wo O

> during these operations. The oblorinated lime need was of Japanese Inspector Baker with gambling in a common manufacture, two samples on examination were gaming house at No. 6, WE Lans, on the 29th found to contain 91.7 per cent and 88.1 per just. They had no defence to make and were cent of real salphario soid and to have relative each fixed \$10, or one month's hard labour. densities of 1.830 and 1.805 and 1.550 respectively. The report was adopted.

THE WATER SUPPLY. The following letter was laid before the

Colonial Scorotory's Office. Fir. In reply to your letter of the 17th last Sanitary Board that it has been decided to increase entimeted that the water supply will be increased by 30,000 00) gallon . - Your obedient servant. J. H. STEWART LOCKHART, Acting Colonial Secretary.

CONSERVANCE BUCKETS: A letter was received from the Acting Colonia Scoretery informing the Hoard that His Excellency was prepared to authorise the expenditure of \$2,5 0 for the parchase of o meervancy

MESSES, BASSOON, SON'S & CO'S, COMPLAINT Mr. J. B. Chook, the Saultary, Surveyor, recomplaint had frequently been mude. Mr Crook wis of asterion that as soon as these hones were plant i thorough sanitary order w nld sease to exist.

e called upon to redrain. SURGEON-MAJOR JAMES second-d. Mr. Francis moved as an amendment that opy of the Surveyor's report be sent to the

parties concerned. Mr. LEIGH swoonded. Amendmentant and lost. illed upou to remedy the defects pointed out in the Surv yor a report. Mr. LEIGH seconded.

The smendment was parried. DRAINAGE BY-LAWS. sproify the work that may be required. At prosent the owner has nothing to go upon; plansfor neither in the press nor in pirliament did have longed to do so but Arthor Sirewsbury redraining are sent in to the Board and approved. contracts made scoordingly, and then the authorities state that other work is meded. If it were olear that all the by laws of 14th October. 180 would be enforced, the architects would know what to do; but it appears that several of these by laws are not intended to apply to the redraining of old premises. It was also requested that when the usual printed notice (San. Bd form No. 6) is sent in amountaing that any work is "There is a latrine in the Bai-view poon ready for inspection, the authorities should notify when the inspection would be made, and that such ting should be in business hours, 9 to 5. Other wise the architect may only know the renalt inspection through his contractor or foreman. whose imperfect knowledge of English may conse misunderstanding. The inspecting officer. should send a written report to the architect An instance of the need for some such change Mr. Crook, Sanitary Surveyor, wrote to the mallest doubt of that She will beat the binere they had played on a good ground that day, and was the case of Mr Livsunght's new building. Board, enclosing the lotter from deers. Danby Leigh, and Orange, and suggesting a reply regard to (1) notriving owners to redrain, His recommendations to the Board invariably believe that she possesses a great deal—she does fainly to his fellow comrades. This was the four enforcing Sanitary By-laws. (3) in specting wor accordance with the Health Ordinance. This desired, therefore, that she should not waste her. The Monkey, and on which the American re-Board, with the addition that some detail entered into to assist owners, though the Board need not do this. The by laws are very chiar, and the Boar in giving detailed explanations would be doing work which private firms are paid to do this would be an insult to the professional knowledge of the architects, and would also be taking business from them. The by laws have been as for as possibly enforced in interrupted or orippled trade. They will not in toto except No. 30, which is waived where down pipes are found good. The opinion expressed by Mesars. Danby, Leigh, and Orange that " several of these by-laws are not intended for the redraining of old premises" appears to be without foundation, but that belief possibly accounts for noompleteness in their original estimates to their clients. These by laws are equally applicable to old and now buildings. As regards notice of inspection and result, etc., the suggestion was adopted previously, but was found to waste a

great deal of time through faulty work, especialy during the plague; the course would, however, be resumed, and if Instead waste of time rosulted it would be reported. The matter was referred to Measrs Danby, Leigh, and Oringe for reply THE GAS COMPANYS DEALSAGE

A PEACE PARTY WANTED INJAPAN

The following article from the Japan Moth semi-official organ of the Japanesa Government. is rather suggestive at the present juncture Japan wants a peace party just now t It is very inspiriting and admirable to see a whole nation stirred as one man by warlike entirestates and roady to afford substantial proof of its mond by putting up great auras of money for military parposes. But such munimity of fighting sentimont has its dangers. It is only too act to push the country to some enterprise which if not notmilly beyond her researces, would at all events at Montreal, New York Philad lphia, Rochester, strain them lobouveniently. Experience has and Hamilton. They had queek wickets. George taught us to dread one thing in Japan above all Pare told me that it was so cold in our much others-fishion. Let it once become the fashion that Wisden bowled in three shirts two pure of to add that His Excellency proposes to have present using the of aswer discharging opposite to do or say anything and the title of saying trousers, and wicket keeping gloves. The Yansuch an Ordinance hitroduced shortly into the Mesers, D. Sas con, Sou's & Co.'s office, of which and doing sets immediately with temporarily kees were so ignorant o pricket that they had account of pricket that they had account of pricket that they had account the control of irresistible force. We have seen some quaint idea of putting "brake" on balls, for they and also some disquieting illustrations of this thought that the wind caused the leather to during the past tweety-seven years. We have twist and turn in its conese. As to Parr's legand connected with the new sawers the nuisance seen the despition of fashion assert itself in hits, it was said that a man was sent up in a the cause of pigs, of rabbits, of roses, of balloon to search for one ball which was last The President moved that the water should railways, of orchide, of monuments, and of soon fly ug through space in the direction anti-Government politics. While each of these of the North Pole. After paying expenses the things was & la mide, the piople seemed to how them mide \$50 spince. Then the rest Kantish their heads with absolute abandon. Na one bowler, Edgar Willahor, took a team out which rentured to be singular Everyone that could included such colebeities as Tom Humphrey, afford to buy a pig, hought one; everyone that Jupp, Peoley, Alfred Shaw, and the fast trandbad a place for ruse culture, prosured a rosetree ; everyone that had aco-as to a platform R. or halting shall have fairly arrived.

A correspondent writes from Swood ander population have left the oily for various parts of de ired to know, however, whather the Company reigns suprema, and things in the peninsula a team to America, but the period but the period to know, however, whather the Company reigns suprema, and things in the peninsula a team to America, but the period to know, however, whather the Company reigns suprema, and things in the peninsula a team to America, but the period to know, however, whather the Company reigns suprema, and things in the peninsula a team to America, but the period to know, however, whather the Company reigns suprema, and things in the peninsula a team. would at any fultre date be called upon to again | are becoming more and more desperate daily was that ment out by Mr. E. G. Sand-re. in remodel their drainage excalignments. The it is a great pity that Japan has gone to August 18 5. They played eight matches and Acting Secretary of the Board replied r questing | war with China over a country that is now as lost one of them -this being the first defeat of being disconnected from drains which are guita- understand nor appreciate Japan's motives and 19, and evoked nabounded entiresiasm the r being connected with the new sawers which the peninsula will undenbiedly be the thestee of time. The Englishmen were afterwards ad been sproially constructed to receive house of war the Japanese (Livermoon will had the avenged, but the spell had so far as the sinage. Appended to the dominents was the tank tax its strength and resources to the atmost. home players were concerned, been broken. The Japan does not realize the full force of her post- next important visit of English players was in ir. J. J. Francis, Q.C.; —B these people have the Korsans hats the Japaness—as the F. Vernon's Indian tour, Tord Hawke was able It needs no descriptive art to make clear the to get together a capable lot to sail to Philareal import and significance of this fact. Since dephis under the sacrices of the Germantown the arrival of Japaneso troops in Scoul, not a club. They played their first match there Korean cools, not a Korean of any kind has against the Gentlemen of Philadelphia, who acreally lent assistance of any description to the tually triumphed by so many as eight wickets. Jap sacre. The difficulties they experience in This was the only reverse in eight matches, and the matter of transport alone for provisions as Lord Hawke attributed it to his men being

from place to place nacept under a strong guard. At the Chinese troops pour in from the north matters will become worse. Where ever and whomover a gorenh village in unfined of the ap reached a artiful of Japanese troops the inhabitenta desert their bours, after filling up the wells and destroying or driving away their horses and cattle. This fact alone speaks volumes. Numbers of Chinese troops have arrived in the province of Ham Kinng (Do) Ping As (Do and Whong Hoi (Do). Their total strength is variously estimated, but it is not baliaved that there are less than from twelve to fifteen thousand. These troups are mostly Manchu men and are armed with Winchester epeating rifles: Against these troops the Japanese have only subcorded in sending to the front up to date about 3,300 men. The force sent is ineuthcleut.

Since the King of Korea fell into the power of the Japanese on the 23rd of July other officers have been selected for the more importent posts in the provinces. Several have essayed to enter upon their duties but have not been successful. The men who bave inst been sopointed Governors of the different provinces have absolutely no control over the people, and anarchy reigns supreme throughout the land. I four that the Japanese demonstration of the year of grace 18 4 will prove no botter than the awful affir of 1592. The Koresna will not listen to reforms soggested by the Japquess and lostend of battering her position in the peniusula, Japan will fluid the mark of Brants usher in the very reversa .- Kobe

SPORT AND ANECDUTE

BY AN OLD FOGEY.

CRICK STING ENTERPRISE It was my intention to have gossinged with von noncerning glorions G andwood but I think have selected a more acceptable subject in the forthcoming tours of English orieksters in distant Shrewabury and Lilly white set out for Kangacooland with a baker's dozen of professionals, and about the same time Mr. E. G. Sanders was bound for America on the Adriatic, with twelve gentle men oricketers of ability. In 1891 Lord Sauffield

and Lord Hawke respectively commanded comand now for the third time are aport-loving adventurous Englishmen bandling off hag and baggage to met the Cornetnike and their Transatlantic sousing on the tented field. We Britishers are a restless, roving people, and love to make other folk enjoy our own peculiar island games. Since before many of us were born have we been despatch. ing bands of cricketers to Australia and America. Mr. Stodart will be in charge of the thirteenth teem which has toured in the land of the kaugaroo, and Lord Hawke is to be the leader of the eleventh party of players which has tripped across the barring pond. Just let as look back for a few " BARLY ENGLISH CRICKETERS IN AMORICA

The first pricketing combination which ever left England for furnin parts was Grorge Pare a twolve which went to Canada and America in 1859 The twelve were John Lilly. white. Il Diver W. Caffva Com L merer. T. Hayward, R. Carpenter, J. Wisden, John Jackson James Grandy Julius Cesar and H. H. Stephenson This was a wouderfully powerful side, and it would have been strange had they not won all their matches and that too sgainst olds . They played five matches lors. Tarrant and Freeman, whilst in 1372 Mr.

ladow, and A. Annielie. MR. GRAGA ACRO'S THE POND. If you want to know what a glorious time this s to be the end? A time mast series when West." They run like this . "Gantlemen. THE DEVELOPMENT OF AMERICAN CRICKET.

In 1879 my friend Riobard Daft took out the

fourth team to America. It consisted of the best professionals in Notis and Yorksbire, and they, like all the other English teams, remained undefeated. Alfred Shaw, whose re-appearance in first-class gricket this year has been one of the events of the amend; played in all the twelve matches, in the course of which be bowled 544 overs for 426 raps, and 178 wickets, or an average of 2.70 runs per wiolet I wonder how many of my resilers know that a Maite and Yorkshire match has been played on the ground of the Germantown onb, Phi-Isdelphia and yet that was arranged by Dalf and Lookwood: Thus during twenty years, between 1859 and 1879, four binds of first-oless 2th Aug. that quite seren Eagline of the Korean bricketers visited America and Canada but somein 1831 went out to Anstralia that way and played four or five matches an route. During the same year (1879) the Gontleman of Ireland sent

nel! as for munitious of war-are snormous, out of form after the voyage. After this Lord They simply cannot move with day priority | Hawke received several rather abusive letters from place to place. To aslight extent this obsta. from Americans. One of them said :-" Serve els has been overcome by bringing over hundreds you right, my Lord Hawke. Instead of bringing Japanese coolles, but the force un the over a team of real oricketors, you have brought LUET OFFICE

CENTRAL: No. 72

Apply to

LORD HAWKE'S TEAM, Still Lord Hawke is by no mouns underrating his opponents, for he is taking out an cleven for something more than "social purposes." tils O Lordship himself is a first-plass bataman and fielder. As one who has capteided Cambridge and Yorkshire, I don't think I need say much O about him. He was born at Willingham rectory. near Gainsborough, Lincolnshire, on August 10, O 1860, and he represented Cambridge in 1882.8 85. He first played for Yorkshire in 1881, and C was made captain in 1881. He is a fine, free, tornible outsman, and when set gots runs as well as any body in the world. But he is such a whole- G souled sportsman that he is never daunted, and seems to stimulate his fellows by his energy and his nil desperandam creed. He has played plenty of cricket in India, America, and Australia. Indeed, no amateur has done more for the game in distant elimes . Like a true Cantab, he is taking three old Light Blues with him in Messes. W. Wright, Sandford Robinson, and A. J. L. Hill, Charles Wright and Sandford Robin. son are both passable batamen, who play for Notts. The former rendered yeoman service. to his Varsity, but has been an ancertain quantity in county originst. Sandford Robinson is a young gentleman of fine physique and some powers, but beither at Hacrow ser Cambridge did be distinguish himself so much as expro ed. Both of thom wan king wicker, and in na amateur combination it is vary desirable to have a pair of "stampers" A. J. Li Will Is a Marlborough boy, who got his bige in his first gear at tambridge, and took put in the great match against Oxford in 1890, 1891, and 1893, and is now a very a seful all round man. Last year he had had average of 17 in betting for his University, and captured 25 wickets for 18 runs such. For his county, Hampahire, his batting figures were 3 0 for 11 innings, average 28 2, while he proved a neeful change bowler. During the winter of 180291 he formed one of Lord Hawke's Indias eleven, and divided the honours of the oum nigo with Mr. F. S. Jaokson. Mr. Hill, playing at Allahabad against all India, soored a fine 131, while for the tour his figures were appealed. In butted 30 times, five sunings not out scored it rund and had an average of 30.17, while he also saptured 69 wickets at a cost of 8.17 runs api-co. Which is why I remark that Hill is a useful man for America. Not content with this, Land Hawke has captured the cruin of the Oxford. eleven, for he has secured Mr. Mordanet, the or role Ozonian batsman, and our of the best fielders to England, Mr. L. C. V. Bithurst, a remarkable all round orieketer, and Mr. G.R. Bardewell, a fine young bowler. Mr. Mordagut, who is qualtfled for Kent, is now in his 22nd year. He had a great reputation at Wellington, but somewhat belied it at Oxford in 1893 This year however. he has made ample amends, for he is now recognised as a flest class betsman with an attractive style and strong hirting powers. Bathurst, who has recently asstated Middlesox, took part in the Gantlemen v. Players match at the Oval this mouth. He was educated of Radley, and has been in residence at Trinity College, Oxford He was undoubtedly the best all round mun in the oleven, for he is a sound and steady but and medium paces left-handed bowler. - lie has an expellent delivery, waries his speed, keeps a good length, and has our deadly bull. In the match against Laucashire he took nine wickets for 84 rane. G. R. Bardswell, who harls from Southport, was educated at Upplogham, where he has benefit d by the advice of that grand old coach, H. H. Stephenson, the famous array Of player. This young gantleman, who belongs to Lineashire, for whom he has played, can bowl with the accuracy of a professional. He is tall, slight, shong, and active, and can but shen near seary. This pair bore the brunt of the attende for Oxford against Cambridge t is your Then Lord Huwke has Mr G. W. Hillyard of Leicestershire, the husband of the lady tennie champion. Mr. Hillyard west out with Lord Hawke in 1891, but enffered from son froks, and had to return home. Mr. C. E. Do Trafford. the Leierstershire and M.C.O. but sinun, exptains | 3 the Midhadshire, and is likely to get a lot of runs Both Mr. J. H. J. Hornaby and Mr. Kennoth MoAtpine have bonn on tour in America before. With Lord Hawke's tema in India in 1889, Mr. Hornsby took 69 wickets, while in America in 1891 he secured 80 for five rape a aplece. In India in 1892-93 Hornsby had a batting average of 18 for 29 inniure, and got

OPENING UP AUSTRALIA. With reference to Mr. Student's Apstralian undertaking, there is not so much to say, because I have gone on the assumption that my readers know less of American oricket and Lord Hawko's team than they do of Australian orisket and Mr. Studdert's companions As. I have said, this will be the thirteenth English team to go to the land of the Southern Cross. Stephenson and C.ffyn, Bred with a faste for travel, by reason of their American experiences, took the first team to Anstrain in 1862, under the management of Messes. Spiers and Pond. At that time little was known of Colonial orioketers. They were certainly poor. but they were fired with eathusiasm for the game, and retained the services of C. Lawrence, of Surrey, as a gouch. Gorge Parre team went in 1864, and the corpstalks persuaded the great Caffya to stay and teach them. The Colonists formed their style on Cattyo, and he was no indifferent model. Every combination which went to Anstralia reported stendy improvement, and in March, 1877, Combined Australia beat England for the first time. The match was played at Melbourn, and the Colouists won by 45 runs, thanks to the flue bats ting of Charles Bannarman, who scored 165; and the bowling of the Victorian, T. Kondali, who took eight wickets for 109 runs. The result of this was that the Australians took heart, and next year sent their first team to logical, with results we all know. Since that your there has been a constant interchange of visits. Now a days the old country and the colony are great rivats in the world of orloket.

no fewer than 120 wickets for about 11 runs

each. This team, which has not been formed

for " social purposes," mile on Sept. 8 and plays

matches in New York, Philadelphia, Baltimore,

and Boston.

ME STODBART'S OFLEBRITIES Mr. Stoddart has twice praviously barb to Anstralia. He went out with Mr Vernon's team in 1887.8, and stayed to play football for Shaw, Shirewabury, and Lillywaite while he was one of Lord Sheffeld's company in 1891-2 And he has given a teste of his quality to Inde down under. for he scored 285 in December, 1887, wentest E ghtuan Malbourne Juniors, and 1 4 in March, 1892 for Lord Sheffielt's eleven against Australia. Last year Stoddart sorred 195, not out and 1:4 in the same match for Middlesax against Notts and harles Turu r. the Australian bowler. went back to Sydney with the impression that the amuteur is the best hatsain in bugland. And I don't know that he is far from the truth. Btoddart is a bandsome young man of 5ft. 10in, and in addition to being a great orioketer, he is almost as great at football, tennis, skating, billiards, bookev and hanting Among the other batsmen are it. Philips son, the old Oxonian, and the Northumberland man, L. H. Gay, the ex-Cambridge wicket-keeper, who was no mean necessor to MacGregor, F. G. F. J. Ford, who may be described as the Bonnor of the side, and Albert Word, the stoney Liencashire-our Yorkshire sun getter. Ford has done some big things in his line. He is one of seven ericketing brothers and last year scored 75 in 45 minutes ugainst Biobardson he has ever done was (12 on a smull ground in 55 mluutes. This was for M.C.13, against Merchant Taylors' School. It is quite un nec saary to write of Briggs, Peel, Richardson, Lookwood, and Walter Humphreys as bowlers, there is ample variety, and three of these men at least are first-class batumen on occasion. Mr. Stoldart wants more batemen, but what's the matter with Abel, Brookwell, Mr. Jackson, or Chatterion? Are none of these available? The tour opens at Adelaide on November 9, and will include no fewer than five matches against Combined Australia.
